

Inclusive Growth and Recovery Challenge

In early 2020, we launched the \$10 million Inclusive Growth and Recovery Challenge as part of our commitment to building the field of data for social impact.

Overview

With support from the Mastercard Center for Inclusive Growth and The Rockefeller Foundation, the data.org Challenge called for breakthrough ideas that harness the power of data to help people and communities thrive, especially in the wake of COVID-19's health and economic impact. In early 2021, we awarded \$10 million in funding and technical assistance to eight exemplary awardees from a pool of over 1,200 applications. The Paul Ramsay Foundation, focused on philanthropy in Australia, funded a ninth award.

Areas of Focus

The Challenge invited proposals in the focus areas named below, but also welcomed submissions for using data to advance shared prosperity, and help ensure inclusive recovery.

Jobs of Tomorrow

Leave no worker behind

Access to Capital

Cities and Towns

HARNESSING THE POWER OF DATA

Inclusive Growth and Recovery Challenge Impact Report

These awardees show the range of opportunities that exist to use data to drive social impact for workers, entrepreneurs, and communities.

AWARDEES

Meet the Inclusive Growth and Recovery Challenge Awardees

We looked all over the world for projects harnessing the power of data science to help people and communities thrive. These proposals emerged as outstanding examples of data for social impact.

BUILD | Aalborg University – Mapping the Regional Quality of Life

BASE – Your Virtual Cold Chain Assistant

Community Lattice – Environmental Risk Model for Revitalization

Fundación Capital – Use of Business Intelligence for Informal Workers

GiveDirectly and Center for Effective Global Action – Using Data Science to Target Cash Transfers for COVID-19 Relief

Solar Sister – Empowering Women Entrepreneurs with Data Science

University of Chicago – Mapping and Mitigating the Urban Digital Divide

Women's World Banking – Making Data Work for Women: Innovative AI for Women's Financial Inclusion

The University of Melbourne – A Fair Day’s Work: Detecting Wage Theft with Data

WEBINAR

Learnings from the Inclusive Growth and Recovery Challenge

Ginger Zielinksie, former Chief Strategy Officer at data.org, led a discussion on key findings & learnings that came out of the ***Inclusive Growth and Recovery Challenge Report*** and features perspectives of both Challenge creation and participation.
