GOOGLE.ORG ACCELERATOR: GENERATIVE AI OPEN CALL

A \$30M global open call for organizations harnessing the power of generative AI to unlock potential for everyone, everywhere.

Introduction Recipients About Focus areas Resources

The **Google.org Accelerator: Generative AI** supports organizations as they harness the power of gen AI technology. Our 2025 recipients received a share of \$30M alongside six months of dedicated pro bono

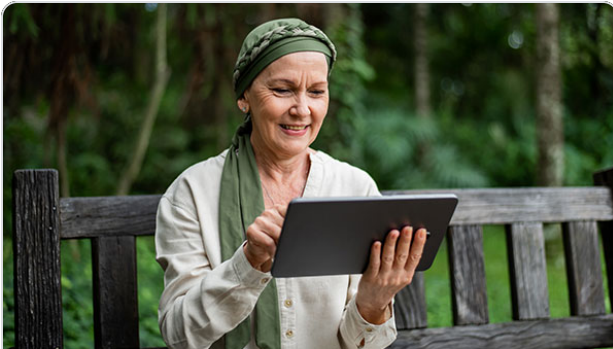

assistance from Google employees, technical training, and access to Google Cloud credits.

well-being.

Recipients

About

To bring the benefits of AI to the social sector, Google launched the Google.org Accelerator: Generative AI in 2024, helping 21 organizations build gen AI-powered solutions that collectively expect to reach more than 30 million beneficiaries over the next three years.

In a recent Google.org survey, nearly two-thirds of nonprofits using AI tools reported feeling more confident in serving their organization's mission when they use AI apps and features, yet only one in five say that at least half their organization uses generative AI. To help even more organizations harness gen AI for social impact, we launched an open call in January 2025 to find the next cohort.

Focus areas

Recipients

Knowledge, Skills, & Learning

We create pathways for people to gain the technical and AI skills they need to thrive in the digital economy.

Scientific Progress

We accelerate research and AI-enabled innovation for societal impact in collaboration with university partners and the academic research community.
